

Aloe 'Harlequin'

Size: Small, **Colour:** Red to orange, **Flower time:** Winter, **Stem:** No, **Frost tolerance:** Medium.

One of the most striking of the 'small compacts' this little aloe cultivar produces spectacular flowers of a rather unusual colour combination - red buds and orange-yellow open flowers.

The flower-to-plant ratio is very good, meaning that you get a lot of flowers for the size of the plant. 'Harlequin' will do best as a container specimen. Sufficient sunlight will ensure good flower colour.
