

Aloe 'Gemini'

Size: Small, **Colour:** Orange, **Flower time:** Early winter, **Stem:** No, **Frost tolerance:** Medium.

Producing a lot of long lasting pale orange flowers in early winter. This tough little hybrid aloe produces a ball shaped plant with decorative foliage that forms an intriguing spiral as it matures.

Suitable for mass plantings, borders or as a pot specimen. If allowed to cluster and given enough space it will quickly grow the secondary rosettes to flowering size, creating a better flower display and extending the flowering period.
