

Aloe 'Citrine'

Size: Small, **Colour:** Orange, **Flower time:** Late Winter, **Stem:** Slow stemming,
Frost tolerance: Low.

Aloe 'Citrine'

Size: Small, **Colour:** Orange, **Flower time:** Late Winter, **Stem:** Slow stemming, **Frost tolerance:** Low.

A small aloe hybrid with rather slender pointed leaves. It produces inflorescences with massive racemes (for its size).

The mass of orange flowers is given a special hue by the slightly paler open flowers. Great for borders in open planting or as a container plant, adding its bright colour at a time when many aloes have finished flowering just before spring.
